**RAT**stands

# Product Features

Adjustable versions of the chair are available to allow the Conductor to alter it to their own requirements. The following versions are available: Non-Adjustable, Seat Adjustable or Seat and Leg Adjustable. The height of the chair can be adjusted easily which allows it to stand level on an uneven or sloping floor, such as on a raked stage. The seat height can be adjusted between 646-759mm, giving the maestro better visibility of the orchestra. The seat position can be adjusted easily and independently.

The chair encourages good posture and provides superior comfort and support during concerts and practice sessions. The chair's narrow back provides support where it is needed without hindering the Conductor's arms, shoulders, and rib cage. The backrest offers support in the upper lumbar region which encourages an upright posture. The horizontal seat with down-turned front edges enables the musician to keep their feet flat on the floor for improved blood circulation. The chair features 2 adjustable footrests which will accommodate almost any leg position and offers relief to the back and legs.

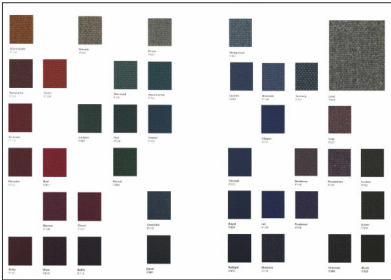

The top-grade steel frame has a black anti-scratch powder coat for maximum durability and a sleek finish. The seat and backrest are manufactured from firm foam and upholstered with high quality, breathable, and flame-retardant fabric.

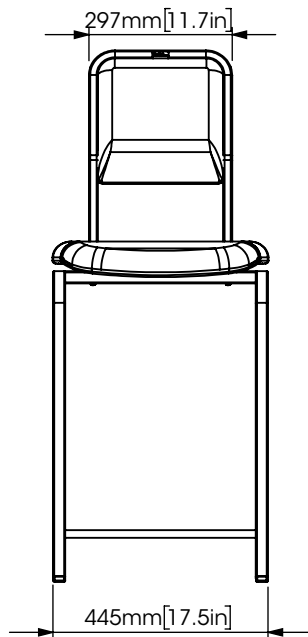

The Conductor's Chair comes fully assembled. Multiple RATstands chairs and stools can be stacked vertically for compact storage.

# Product Features

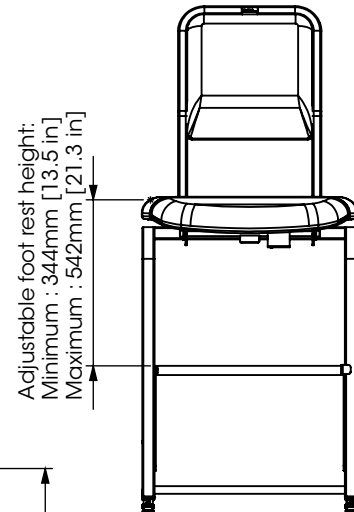

The chair's standard charcoal fabric is sophisticated and minimal. We offer a range of upholstery colours for a custom look to ensure stand out performances.

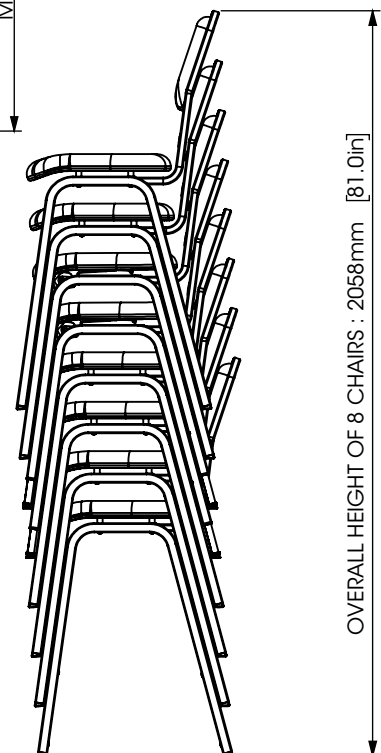

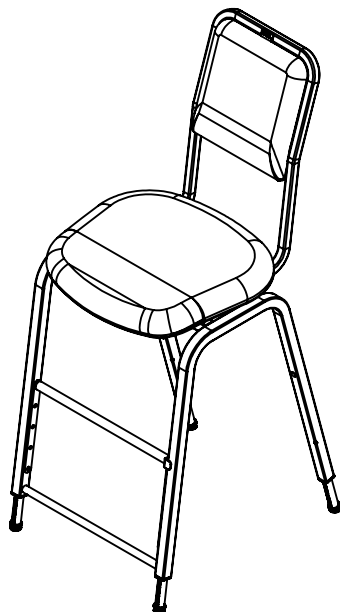

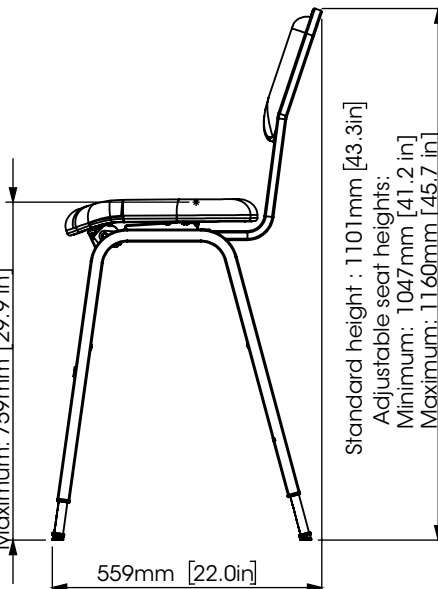

Standard Conductor's Chair

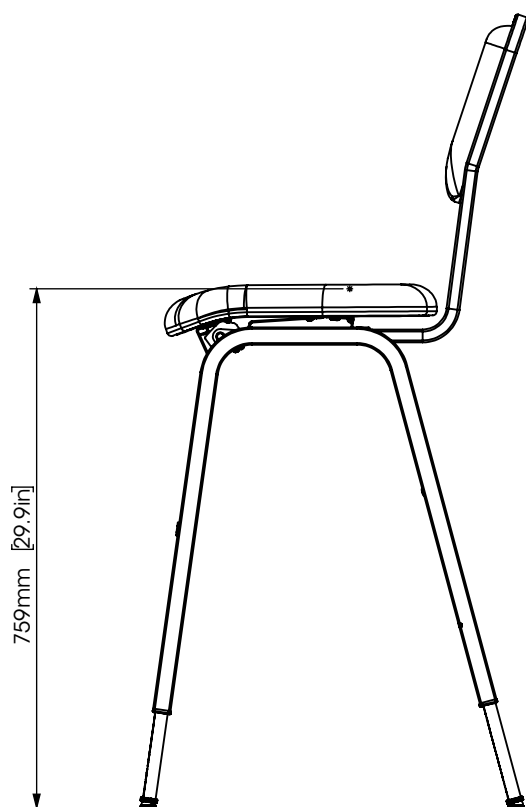

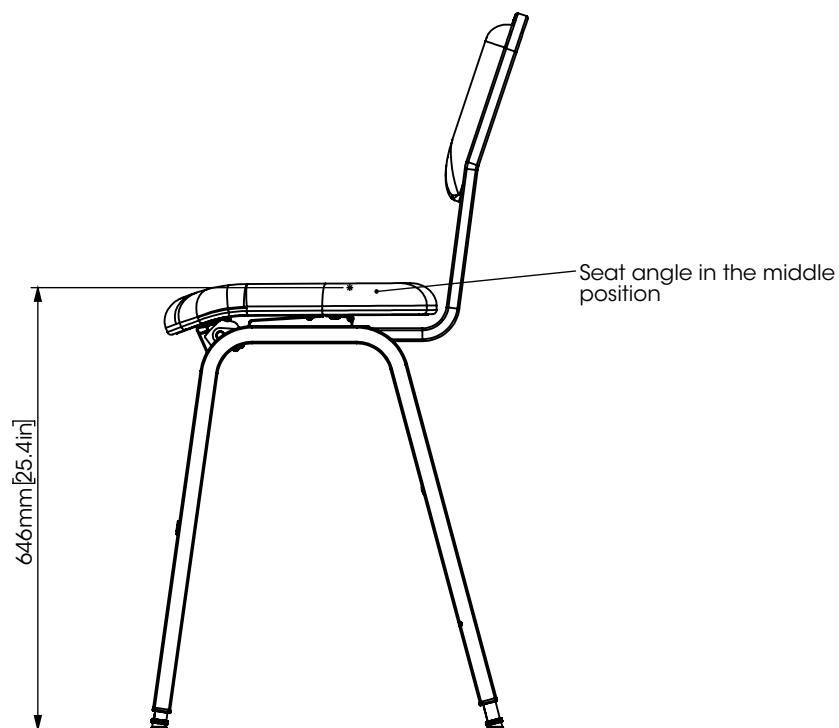

Fully adjustable Conductor's Chair

Standard Seat height : 700mm [27.6in]  
Adjustable seat heights:  
Minimum: 646mm [25.4 in]

## Specifier's description

Heavy duty conductor's chair with adjustable seat angle and adjustable leg options. Adjustable footrest on 3 sides. Solid steel fixed frame, coated in a textured polyester powder. 35mm thick foam seat and back rest, upholstered in a flame retardant fabric. Narrow backrest allows free movement of arms and shoulders. Chairs form a near vertical stack on a flat floor.
